

# Seminar

## on the health of dairy herds

3<sup>rd</sup> edition  
11 and 12 December 2007  
Hôtel Clarion, Québec

This large-scale event organized by the [Association des médecins vétérinaires praticiens du Québec](#) (Québec Veterinary Practitioners) that will gather many stakeholders in the dairy industry, including CIAQ, is a unique opportunity to share state-of-the-art information on the health of dairy herds and to incite useful exchanges and interactions between participants, in an informal context. Those two days promise to be a rich learning experience for all participants, whether they are dairy producers, veterinary practitioners or professionals of the dairy sector.
