

# Lely Heatime Heat Detection System

## You think heat detection 24 hours a day, 365 days a year, is impossible? **We Have the Solution!**

*This revolutionary technology monitors the activity level of cattle and identifies when the animal should be bred. The "stand alone" system does not need to be linked to any milking system or computer, making it very affordable for any loose housing environment. Heatime is effective for both milking cows and heifers.*

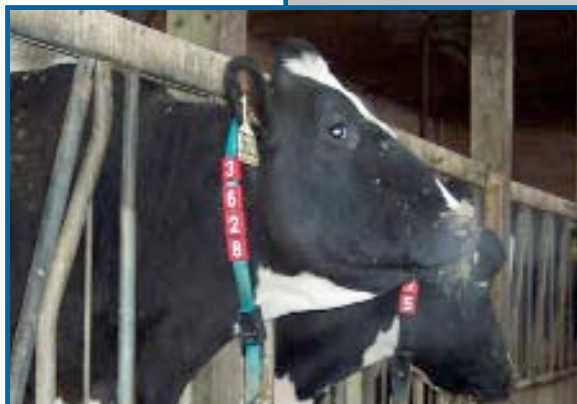

### Check out these features...

- ✓ Simple design and set-up
- ✓ Economical
- ✓ "Stand Alone" system
- ✓ Helps identify "inactive" cows who may be experiencing health problems
- ✓ Monitors activity 24 hours a day
- ✓ User friendly
- ✓ Proven technology
- ✓ Reduce days open and semen purchases
- ✓ Easy to install in heifer barns
- ✓ Simple solution for heat detection in heifers
